

DUALENE™ HPS

MODIFIED ALCOHOL SOLVENT FOR HIGH PURITY CLEANING

In high purity cleaning, the perfect interplay between machine technology, application technology and the cleaner is crucial to achieving the extremely high cleaning standards.

DUALENE™ HPS, a modified alcohol solvent, has been specifically developed to help meet exceptionally demanding cleanliness requirements of high purity applications. Used in combination with state-of-the-art closed vacuum cleaning equipment, DUALENE™ HPS enables cleanliness reproducibility, high process stability and superior surface quality thanks to:

HIGH SOLVENT PURITY

- ✓ High purity modified alcohol grade
- ✓ Synthetically produced

DOUBLE FILTRATION FOR INCREASED PROTECTION

- ✓ 2-step filtration – first before production and second time during the filling process
- ✓ Solvent delivered exclusively in composite drums produced by accredited drum manufacturer – Outside steel, Inside HDPE (High density polyethylene). The HDPE of the liner is FDA approved.

HIO-SERVICES

- ✓ Certificate for hydrogen-induced outgassing (HIO) substances, including analysis of silicon, measured by state-of-the-art ICP OES method

DUALENE™ HPS is further characterized by low toxicity, good biodegradability and multi-metal compatibility.

WIDE INDUSTRY APPLICATIONS

- ✓ SEMICONDUCTOR MANUFACTURING
- ✓ OPTICAL AND OPTOELECTRONIC INDUSTRY
- ✓ EUV LITHOGRAPHY
- ✓ HIGH-VACUUM TECHNOLOGY (XHV, UHV, UCV)
- ✓ SENSOR TECHNOLOGY
- ✓ LASER AND ANALYSIS TECHNOLOGY
- ✓ PHOTONICS
- ✓ THIN-FILM TECHNOLOGY
- ✓ AEROSPACE
- ✓ ELECTRONICS MANUFACTURING
- ✓ MEDICAL AND PHARMACEUTICAL TECHNOLOGY
- ✓ E-MOBILITY

COMPLEMENTARY SERVICE ELEMENTS FOR MAXIMIZED PROCESS STABILITY

We provide additional service elements to further optimize the high purity cleaning application by maximizing process stability, extending solvent lifespan and minimizing chemical consumption (and hence raising sustainability performance).

With MAXICHECK™ Test Kits, solvent quality and condition can be easily monitored and tested on-site. The test results can provide reliable information on whether re-stabilization is required.

Where necessary, our contact-free, state-of-the-art stabilizer system, MAXISTAB™ S-Series, can be added to bolster process stability to enable optimal and consistent cleaning results.

SAFECEM AS YOUR PERFORMANCE OPTIMIZER

As a pioneer of modified alcohols for precision cleaning, our long-established product DOWCLENETM* 1601 is already widely used in high-value manufacturing sectors such as aerospace, automobile and medical technology and hence represents one of the purest modified alcohols available on the market today.

With DUALENETM HPS, we have a tailored specialty product helping to meet even higher cleaning requirements, particularly in semiconductor production, amongst others.
